Career Objective

Build production-ready web applications using JavaScript, React, and Django, with a focus on clean frontend architecture, reliable backend logic, and real-world problem solving in collaborative development teams.

Experience / Internship

Python Intern — YBI Foundation

Aug 2024 (2 Weeks)

- Developed Python scripts to solve logic-based and data-processing problems.
- Implemented functions, loops, conditionals, and core data structures.
- Worked with file handling and basic error handling to improve code reliability.
- Debugged and optimized Python programs for correctness and readability.

Education

Bachelor of Technology (B.Tech) — Computer Science & Engineering
NIET, Greater Noida

2023–2027
CGPA: 8.0

Senior Secondary (Class XII) — PCM, UP Board
MG Inter College, Gorakhpur

2021–2022
Score: 92%

Secondary (Class X) — CBSE
Saraswati Shishu Mandir Sr. Sec. School

2019–2020
Score: 92%

Projects

AI Quiz Master — Full Stack Web Application

- Built a full-stack quiz platform using React and Django with secure user authentication.
- Designed database models for quizzes, user responses, scoring logic, and leaderboards.
- Tech Stack: React, Django, JavaScript, Python, SQL

Food Donation Web Application

- Developed a web application connecting food donors with NGOs.
- Implemented backend APIs and database schemas for users, donations, and request tracking.
- Tech Stack: Django, HTML, CSS, JavaScript, SQL

Skills

- **Programming Languages:** Python, JavaScript, C++
- **Frontend:** React, HTML5, CSS3
- **Backend:** Django
- **Databases:** SQL
- **Tools & Concepts:** Git, GitHub, Basic DSA
- **Libraries:** NumPy

Certifications

- Python Programming Certification — YBI Foundation
